## **LaSalle Solutions Achieves Cisco Advanced Security Architecture Specialization in US**

**ROSEMONT, Ill., Sept. 13, 2016** — LaSalle Solutions, a leading provider of technology lifecycle management services, announced today that it has achieved Advanced Security Architecture Specialization from Cisco. The specialization recognizes LaSalle Solutions as having fulfilled the training requirements and program prerequisites to sell, design and deploy comprehensive Cisco security solutions.

As a Cisco Advanced Security Architecture Specialized Partner, LaSalle Solutions has proven its ability to provide sophisticated, value-added Cisco solutions through in-depth sales capabilities, technology skills and service offerings.

“We have worked hard to achieve the Advanced Security Architecture Specialization,” said Steven Robb, president of the solutions group at LaSalle Solutions. “Like Cisco, LaSalle Solutions is dedicated to giving our customers the security coverage they need to protect their organizations against increasingly complex threats. With this specialization, our customers will have access to the latest security solutions to help guard their networks against malicious attacks and breaches.”

The Cisco Channel Partner Program provides partners with the training required to build sales, design and technical talent and then validates their skills through a third-party audit.
