LaSalle Solutions' New Video Highlights Power of IT Infrastructure Integration Using LAMP

ROSEMONT, Ill., June 1, 2016 — LaSalle Solutions, a leading provider of technology lifecycle asset management services, has introduced a new video highlighting how the company is empowering simplicity and integration to streamline IT infrastructure lifecycles.

The video highlights how LAMPSM, LaSalle's cloud-based platform, seamlessly integrates with existing cloud-based and proprietary IT management dashboards to help customers aggregate and streamline their technology infrastructure information, enabling better lifecycle management of data across their IT ecosystems.

"Our new video shows how LAMP helps customers to not only integrate with their own proprietary dashboard management tools or platforms like ServiceNow, but also enable full visibility into their network architectures and help them plan for the future," said Steven Robb, president of the solutions group at LaSalle Solutions. "LAMP gives customers the perspective they need to take control of their IT infrastructures and ensure that maintenance contracts and other key information are up-to-date and in sync with manufacturer records. When you need to be prepared for anything, the right perspective changes everything."
