LaSalle Solutions Recognized as Cisco Application Centric Infrastructure Authorized Technology Provider Partner in the United States

Rosemont, Ill., May 19, 2015 — LaSalle Solutions announced today that it has achieved Application Centric Infrastructure (ACI) Authorized Technology Provider (ATP) designation from Cisco. The designation recognizes LaSalle Solutions as having fulfilled the training requirements and program prerequisites to sell, deploy and support Cisco Application Centric Infrastructure products and solutions.

Participation in the Cisco ACI ATP Program allows LaSalle Solutions to offer its customers a new data center architecture designed to simplify operations and greatly reduce provision time through automation for their applications.

"We are proud to receive Cisco ACI partner designation in recognition of the time and training we have invested to ensure that we are bringing the best possible value and support to our customers," said Steven Robb, president of the solutions group at LaSalle Solutions. "In an industry that is quickly evolving, we understand the importance of providing our customers with the most advanced business solutions as well as a smooth transition into those services. Cisco ACI gives LaSalle Solutions and our customers the flexibility and scalability we need to stay ahead of emerging industry demands."

To earn the ACI ATP designation, LaSalle Solutions fulfilled Cisco application centric infrastructure training and exam requirements. LaSalle Solutions also met the personnel and post-sales support requirements set forth by Cisco.

The Cisco Authorized Technology Provider Program is part of the Cisco go-to-market strategy for emerging technologies. The program helps Cisco to define the knowledge, skills and services that channel partners need to successfully sell, deploy and support an emerging technology practice.

About Cisco Application Centric Infrastructure

ACI in the data center is a holistic architecture with centralized automation and policy-driven application profiles. ACI delivers innovative software flexibility with the scalability of hardware performance. An ACI network is deployed, monitored

and managed in a fashion that supports DevOps and rapid application change. ACI does so through the reduction of complexity and a common policy framework that can automate provisioning and managing of resources.

About LaSalle Solutions

Founded in 1980, LaSalle Solutions is a leading provider of life-cycle management services for technology and capital assets. These services include acquisition and financing, IT asset management, maintenance contracts management, remarketing and disposition. LaSalle Solutions' processes, outstanding customer service and powerful, market-leading cloud-based toolset, LAMP, enable customers to more economically and effectively manage and plan to meet their goals.

LaSalle Solutions is a subsidiary of MB Financial Bank, N.A., a commercial bank headquartered in Chicago. MB Financial, Inc. is the publicly traded holding company for MB Financial Bank, N.A. and is traded on the NASDAQ as "MBFI."
