Martin Roesch, vice president and chief architect, Cisco Security Business Group

Martin Roesch is vice president and chief architect for Cisco Security Business Group. He is responsible for shaping the technology strategy and design of the company's comprehensive security portfolio and also oversees threat research, including the Talos Security Intelligence and Research Group. Roesch joined Cisco through the acquisition of Sourcefire, which he founded in 2001. At Sourcefire, he was Chief Technology Officer (CTO) and a member of its Board of Directors. Roesch, who has more than 20 years of industry experience in network security and embedded systems engineering, is also the author and lead developer of the Snort® Intrusion Prevention and Detection System (www.snort.org) that forms the foundation for next-generation IPS.

Roesch has received a host of awards for his technology innovation and vision. Most recently, he was recognized as one of the Top 25 Disrupters of 2013 by CRN Magazine for the value his innovations provide partners and customers, and was earlier selected as one of eWeek's Top 100 Most Influential People in IT.
